POOJA SHANKHLA

Full Stack Developer | React.js • Node.js • TypeScript | Immediate Joiner

Bengaluru, India | +91 9783224446 | poojasankhala.dev@gmail.com | Portfolio | LinkedIn | GitHub

PROFILE SUMMARY

Full Stack Developer with 3.5+ years of experience building web applications using React.js, Node.js, Express.js, and MongoDB. Experienced in developing REST APIs, real-time WebSocket systems, responsive interfaces, and performance-focused architectures. Built Generative AI integrations and independent applications using LLMs, RAG, LangChain, vector databases, and semantic caching.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React.js, Next.js, Redux Toolkit, Material UI, Tailwind CSS, HTML5, CSS3

Backend & Databases: Node.js, Express.js, REST APIs, WebSockets, JWT, Authentication, RBAC, MongoDB, Vector Databases

AI/LLM: OpenAI API, OpenRouter API, LangChain, RAG, Semantic Caching, Prompt Engineering

Testing: Jest, React Testing Library

Tools: Git, GitHub, Postman, Swagger, Firebase, CI/CD

WORK EXPERIENCE

Software Engineer — MERN Full Stack Developer

CoffeeWeb Technology Pvt. Ltd., Bengaluru, India *Jul 2023 – Jun 2026*

- Developed a Generative AI feature using React.js, Node.js, Express.js, and MongoDB, integrating a secure conversational chatbot API for low-latency responses.
- Designed backend services and admin modules for Menu, Coffee Reports, and News Feed workflows using Node.js, Express.js, MongoDB, and REST APIs.
- Reduced infrastructure costs by approximately **22%** by building an event-driven WebSocket system that restricted market-data connections to active exchange hours.
- Increased organic traffic by approximately **15%** through dynamic metadata while improving frontend performance with reusable React components, lazy loading, infinite scrolling, and Firebase notifications.
- Refactored core React.js modules and created reusable components to eliminate redundant state logic, reduce duplicate code, and improve maintainability across frontend features.

Software Engineer — React.js Developer

Canopi India Pvt. Ltd., Bengaluru, India *May 2022 – Nov 2022*

- Developed responsive admin dashboard modules for user management, role-based access control, and content workflows using React.js and Material UI.
- Built reusable components for forms, inputs, buttons, and modals, reducing duplicate code and maintaining visual consistency across product modules.
- Implemented centralized API error handling and state-management workflows for authentication, form validation, user sessions, and dynamic data filtering.

PROJECTS

Prism – AI Gateway | *Node.js, Express.js, MongoDB, OpenRouter API*

- Built multi-provider LLM routing and semantic caching using the OpenRouter API.
- Added retry, provider failover, and usage metering for reliable AI requests.
- Created a dashboard to track traffic, cost, latency, and cache performance.

RAG-Based Profile Matching | *Node.js, Transformers.js, PDF.js, Chart.js*

- Extracted and processed resume content from uploaded PDF documents.
- Ranked candidates against job descriptions using semantic search and hybrid scoring.
- Generated local embeddings with Transformers.js and stored vectors in JSON without paid APIs.

CERTIFICATIONS

Airtribe – AI-First Software Engineer, Bengaluru, India *Oct 2025 – Jul 2026*

Masai School – MERN Full Stack Developer, Bengaluru, India *Jun 2021 – Feb 2022*

EDUCATION

B.R. Mirdha College – M.A. in Political Science, Nagaur, Rajasthan *Jul 2017 – Jun 2019*

Maadi Bai College – B.A. in English Literature, Political Science & History, Nagaur *Jul 2014 – Jun 2017*
